

Transparency Declaration 2020 - Interactions with Patient Advocacy Groups

Display/Hide Patient Group Definition & General Instructions

SANOFI

Patient Group Definition

Patient Groups include patient associations. They are organizations which focus on specific diseases or aspects of healthcare, representing and/or supporting the needs of patients and/or caregivers. These groups are for patients and/or caregivers (family/friends), but can also be composed of consumers, seniors, women, minority populations or caregivers and may be led by advocacy professionals who may or may not have personal association with a given disease. Note some associations can be both a Medical or Scientific Association and a Patient Association in different parts (e.g. national/international vs. local), in this case it will be considered as one or the other based upon whether an activity or event is largely planned and intended for Health Care Professionals or patients. For the purposes of this exercise the "patient" activities/events should be included.

General Instructions

For each project, all fields should be completed. A red "X" in column A indicates that some fields are missing. All activities commissioned during 2020 should be listed with a separate entry for each interaction. For multiple year projects initiated prior to 2020 where payments have been made in 2019, these payments should be included with the sum of payment for 2019. Do not leave blank rows between projects.

Please enter Country where Patient Group HQ is located. If group is Pan-European or International in remit, enter "Pan-European" or "International" as the Geography irrespective of specific HQ location.

OK
